

Robot Operating Sys & Platform – A.I. Spring 2026 ITAI 2374 Entrance Questionnaire

This course is a part of the Artificial Intelligence (A.I.) program at Houston Community College. The A.I. Program at HCC is in one of the most exciting areas of the country (Houston, Tx). Home of NASA, Space X, Oil and Gas, the World's Largest Medical Center, one of the largest manufacturing infrastructures in the country and super home to Communications Capabilities for most of the big players. Houston and Dallas are also homes to the largest Data Science/Cyber Security Operations anywhere in the country. So, Houston and Texas have it all. What is important for you to know is that with so much industry already in the action of major A.I. Implementation it makes Houston an inviting HOTBED of A.I. development. With so much activity comes many types of new job opportunities.

It is important to Houston Community College to make sure we help you chart a clear path to where you would like to go professionally. Artificial Intelligence is going to be everywhere and in every field from retail to healthcare to construction to Finance to Real Estate, Manufacturing, Education and HR (talent engagement). This affords you many opportunities to take what you already know and what you are learning and find the opportunity that is right for you. Our job is to help you get there. Whether you stay a part of this program or not we would like to help you nail down that right pathway for you.

If you don't mind, please tell us a little about you and where you are headed. We would like to keep in touch and follow up with you over the next few years to see if we contributed to your professional growth as well as send helpful information your way regarding developments in the A.I. marketplace that might help you.

If you don't wish to answer a question, simply leave it blank. There is no partial grade on this participation questionnaire – any submission gets a grade of 100%.

1. What prompted you to take this course? **I'm interested in learning how robot operating systems work and how AI can be applied to robotics.**
2. What are you interested in doing professionally? **I'm interested in AI and cybersecurity, especially in robotics and intelligent systems, but I'm still exploring exactly which career path to take.**
3. What is a general email address for you? (This will only be used if we cannot reach you via the course email in the Inbox Tool of the Canvas website for the course.) **2005eva2020@gmail.com**
4. What is your major? **Artificial Intelligence and Robotics.**
5. Are you single/married? _____ **I'm single** _____ Age: **20** _____
6. What type of opportunity are you seeking? **I want to gain practical experience in AI and robotics and see what career path fits me best.**
7. What is your degree program? **I'm pursuing an Associate degree in Computer Science and Information Technology, with a focus on AI and Robotics.**

8. Any additional education? **No additional education so far; I'm working on my associate degree.**
9. Type of work you enjoy? **I'm still learning, but I enjoy technology, problem-solving, and AI-related projects.**
10. Interests: **I'm interested in AI, robotics, and cybersecurity. In my free time, I enjoy reading sci-fi books and playing video games.**
11. Areas of A.I. you find interesting? **Besides robotics, I'm also interested in natural language processing (NLP).**
12. Areas of Business you find interesting for A.I.? **I find interesting areas like cybersecurity, data analysis, and business automation.**
13. Are you good with Computers, Social Media, Databases, Marketing, Oil/Gas etc.? **I'm good with computers, and I'm still learning about other areas like social media and marketing.**
14. Do you program or would you like to program? **I have a basic understanding of programming and would like to continue improving my skills.**
15. Would you like us to send you information? Name: **Eva Abou Harb**
Email: 2005eva2020@gmail.com Phone: 786-754-2200
Mailing Address: 20214 Black Canyon Drive, Katy, TX 77450
